FOR IMMEDIATE RELEASE

Enhanced Web-Based Processes

ATS-TC a leader in Training Development and Implementation announces two new delivery methods for training and sales support. Realizing the pressures on travel budgets for instructor led courses ATS-TC has developed and implemented an enhanced Webinar environment with the goal of moving the classroom environment to the web. This maintains the advantages of class interaction between students and instructor. They also launched a new sales and support module to assist companies in reaching out to customers in a more targeted economical way than in the past.
